Dear Sirs,

I would like to introduce you to the Bofam Foundation, a social orientated NGO which was founded in Ghana by the undersigned in 2013 with the objective of providing social assistance to needy institutions such as School for the Deaf, school for the Blind, Orthopaedic Training Centre, individual clinics and schools without light and water. At times special assistance is provided to an individual, for instance recently Bofam contributed to a 'hole in the heart' operation of a young girl.

The assistance is based upon social responsibility and sustainability, involving green energy solutions as far as possible, including water supplies, solar electricity and solar irrigation for agriculture. In this respect Bofam is also sponsoring Solar Energy Training service providers in the communities. - It is expected that a beneficiary offers a contribution in kind or in cash and has a reliable management structure in place.

The daily activities of Bofam Foundation are managed by Ms. Hellena Buabeng a competent Ghanaian lady on a voluntary basis providing full transparency, reports and accounts.

On our www.bofamfoundation.org you will find details of projects undertaken.

Yours sincerely

Frede Bosteen
Founder
