APPEAL FOR THE PROVISION OF SOLAR PANEL LIGHTS AND

INDUSTRIAL SEWING MACHINES

I write to appeal to you for the provision of Solar Panel Lighting system and Industrial sewing machines in Koforidua School for the Deaf. The school has a student population of 250. We have many challenges confronting us as an institution that caters for handicapped students.

CHALLENGES:

1. The school is plunged into total darkness most of the times, making the school environment dangerous, especially in the nights
2. Thieves take advantage of darkness to break in and make away with school properties under the cover of darkness.
3. Interaction among the deaf students during the dark hours is a problem and impossible since they use their hands in communication. (Note: Interaction among the deaf is purely manual, that is the use of sign language, an act that is not possible without light)

Sir, as you also saw during your visit, most of our industrial sewing machines have broken down beyond repairs and a provision three 3 new ones would be of great help .

We are therefore appealing to you to support Koforidua School for the Deaf with 25 solar panel lights and 3 industrial sewing machines to address the above challenges

Thank you

Jordan E. Agbona
